Transform your meeting room or huddle space into a conference room with the Targus® All-in-One 4K Video Conference System. Merging three necessities for a collaborative workspace virtually anywhere with anyone — a webcam, a speaker, and a microphone — the Video Conference System offers clear video, clear sound, and clear voice in the ultimate conferencing solution for small- to mid-sized meeting rooms.

Ensuring each collaborator is seen and heard, this all-in-one has a 4K Ultra HD webcam with 120° wide-angle lens, integrated 6-piece microphone, and dual speakers. Its Low Illumination 8.5MP sensor will capture a clear image of the room while its 5X digital zoom supports electronic PTZ to focus on the speaker. It has a foldable, anti-slip rubber base for placement on top of a monitor or on any flat surface, but can also be mounted to any wall for optimal use. Wherever it's placed, the microphones can pick up audio from 20 feet (6 meters) away and its speakers are optimized at the 200–16,000 Hz frequency range to provide clear speech and sound as though you're all in the same room.

And you don't need to worry about installing drivers to operate or waste valuable meeting time connecting and disconnecting to the unit — the Video Conference System simply connects to your laptop or mobile device via 2M USB-A cable. Designed with ease in more ways than one, this system was created with the customer in mind to easily make every collaborative workspace conference-capable without sacrificing quality. The Targus® All-in-One Conference Video Conference System is all you need to keep your team connected and improve the conference room experience.
