

HPE Aruba Networking 740 Series Campus Access Points

HPE Aruba Networking AP-745 (US) Tri Radio 4x4/2x2 Wi-Fi 7 Internal Antennas Campus Access Point (S5R01A)

What's new

- High-performance compact Wi-Fi 7 access points with right-sized features ideal for high-density indoor deployments.
- AI-driven orchestration and management with HPE Aruba Networking Central helps provide amazing wireless experiences.
- Comprehensive triband coverage across 2.4 GHz, 5 GHz, and 6 GHz and delivers up to 9 Gbps maximum

Overview

The HPE Aruba Networking 740 Series Campus Access Points are high-performance Wi-Fi 7 access points designed to deliver high-capacity and secure Wi-Fi ideal for demanding indoor use cases. Leveraging the Wi-Fi 7 standard, this series provides the ideal combination of high-end performance with rightsized features to enhance security, support IoT devices, and provide accurate location-aware capabilities.

HPE Aruba Networking Central helps drive efficient operations and provides AI-automation and machine learning (ML) insights for fine-tuned wireless connectivity across diverse environments.

tri-band aggregate data rate.

- Seamlessly onboard IoT devices with flexible integrated IoT radio that can be configured for Bluetooth or 802.15.4/Zigbee operation.
- Fast 5 Gbps Ethernet wired connectivity and conveniently powered by PoE.
- Dynamic power save mode helps reduce energy consumption.

Future-proof with the 740 series that delivers up to 9 Gbps maximum tri-band aggregate data rate and goes beyond the standard with a built-in flexible IoT radio that supports Bluetooth or 802.15.4/Zigbee, a fast 5 GbE wired port, and AI-powered dynamic power save mode that helps reduce energy consumption. The 740 series is Wi-Fi certified and includes a limited lifetime warranty.

Features

Rightsized Wi-Fi 7 with AI-driven Management

The HPE Aruba Networking 740 Series Campus Access Points, part of the Low Power Indoor (LPI) device class, take advantage of the increased capacity of the 6 GHz band using three dedicated radios, which translates into high speeds, wider channels for multi-gigabit traffic, and less interference.

Intelligent automation, AI insights, and unified infrastructure management, provided by HPE Aruba Networking Central, enhance wireless performance and help drive more efficient IT operations.

Supporting up to 160 MHz wide channels, the 740 series delivers up to 9 Gbps maximum tri-band aggregate data rate, using up to 4x4 MIMO radios (2x2: 2.4 GHz, 4x4: 5 GHz, and 4x4: 6 GHz).

Using powerful 4x4 MIMO radios, the 740 series can sustain 3- and 4-spatial stream data rates with supported clients.

Dynamic bandwidth adjustments support changing device density, enhanced roaming, and real-time channel assignments to mitigate co-channel interference and built-in filtering automatically reduces the impact of interference for better Wi-Fi experiences.

Comprehensive Security Built-in

The HPE Aruba Networking 740 Series Campus Access Points offer enhanced security with dynamic segmentation to eliminate the time consuming and error-prone task of managing complex and static VLANs, ACLs, and subnets by dynamically assigning policies and keeping traffic secure and separated.

Network protection with stronger encryption and authentication with WPA3, secure credentials/keys storage for guest access with Enhanced Open, and user and IoT access policy enforcement firewalls.

AI-powered classification of all Wi-Fi clients and IoT devices through HPE Aruba Networking Central uses deep packet inspection to provide behavioral context that help ensure devices are receiving proper policy enforcement and continuous monitoring.

To simplify policy enforcement, the 740 series uses the policy enforcement firewall (PEF) to encapsulate all traffic from the access point to the gateway (or mobility controller) for end-to-end encryption and inspection.

For enhanced device assurance, HPE Aruba Networking access points include a built-in TPM for secure storage of credentials and keys, and boot code.

Simple and Flexible IoT Platform

The HPE Aruba Networking 740 Series Campus Access Points can serve as flexible IoT platforms that bolster network security and provide coverage for broad range of IoT devices without the need for network overlays for IoT devices.

HPE Aruba Networking Central IoT operations unifies visibility of IT and OT infrastructure within the network health dashboard by extending network monitoring, visibility, and insights to BLE, Zigbee, and other non-IP IoT devices.

A single, flexible, integrated IoT radio supports either BLE or 802.15.4/Zigbee operation to simplify deploying and managing IoT devices.

A USB port supports additional connectivity to a wider range of IoT devices.

A broad ecosystem of technology partners and certified solutions helps extend IoT capabilities and provide interoperability for easier installations and operations.

Location Services and Energy Saving

The HPE Aruba Networking 740 Series Campus Access Points help organizations deliver precision indoor location services by supporting FTM 802.11az for sub-1 meter accuracy.

Reduce energy use with the dynamic power save mode that enables the 740 series to sleep and then automatically wake up when connectivity demand arises, reducing power demands and lowering the energy footprint.

Intelligent power monitoring provides energy consumption insights as the access points continuously monitor and report hardware energy usage.

HPE Aruba Networking access points can also be configured to enable or disable capabilities based on available PoE power—ideal when wired switches have exhausted their PoE power budget.

Target Wake Time (TWT) establishes a schedule for when IoT clients need to communicate with an access point to help improve client power savings and reduce airtime contention.

Technical specifications		HPE Aruba Networking AP-745 (US) Tri Radio 4x4/2x2 Wi-Fi 7 Internal Antennas Campus Access Point
Product Number	S5R01A	
Certifications	Wi-Fi Alliance® (WFA); UL2043 plenum rating WPA2 and WPA3 (enterprise, personal) Enhanced Open (OWE) WMM, Wi-Fi® agile multiband Wi-Fi certified a, b, g, n, ac, 6, 7 WMM, Wi-Fi agile multiband Bluetooth SIG Ethernet Alliance (PoE, PD device, class 6)	
Regulatory	FCC/ISED CE marked Low voltage directive 2014/35/EU UL/IEC/EN 62368-1; EN60601-1-2	
Wi-Fi antenna	AP-745: Integrated down-tilt omnidirectional antennas for 4x4 (2x2 on 2.4 GHz) MIMO. Built-in antennas are optimized for horizontal ceiling-mounted orientation of the access point (AP). The down-tilt angle gain is roughly 30° to 40°.	
Ports	EO: One Ethernet wired network port (RJ-45) UO: One USB 2.0 host interface (Type A connector) Serial console interface (proprietary, micro-B USB physical jack) Kensington security slot	
AP management	On-premises Public Cloud as a Service Virtual Private Cloud (VPC)	
AP operating system support	HPE Aruba Networking OS-10	
Cellular support	No	
Deployment	Indoor	
Integrated sensor	No	
IoT support	IEEE 802.15.4/Zigbee Bluetooth 5.4	
Location services	802.11 FTM support	
MACsec support	No	
Radio configuration options	2.4 GHz + 5 GHz + 6 GHz	
Supported bandwidths and peak data rate	20 (2.4 GHz), 20/40/80 (5 GHz), 20/40/80/160 (6 GHz), and maximum peak data rate 9 Gbps	
Ultra tri-band (UTB) filtering	No	
Wi-Fi generation	Wi-Fi 7 (802.11be)	

Technical specifications	HPE Aruba Networking AP-745 (US) Tri Radio 4x4/2x2 Wi-Fi 7 Internal Antennas Campus Access Point
Wi-Fi radios	2x2: 2.4 GHz, 4x4: 5 GHz, and 4x4: 6 GHz
Wired network interface	Single 5 Gbps
Warranty	Limited lifetime warranty. See the warranty duration.
Product dimensions (metric)	AP-745 Single-Pack: 252 mm x 267 mm x 86.9 mm AP-745 Multi-Pack (5-Pack): 462 mm x 269 mm x 296 mm
Weight	AP-745 Single-Pack: 1.7 kg AP-745 Multi-Pack (5-Pack): 9.6 kg

HPE Aruba Networking Services

HPE Aruba Networking services simplify and accelerate the network technology lifecycle, enabling your network to scale with better predictability and cost-effectiveness. Whether you operate your own network and need to improve your IT efficiencies, or you want to offload some of the burden, we have the services you need to reach your goals.

Learn more about what HPE Services - Aruba Networking has to offer at: hpe.com/edge/services

Support Services

Our support portfolio provides the essential support elements as well as proactive and preventive features to help you improve your team's productivity and get the most from your network. Our support customers benefit from faster issue resolution, simplified operations and efficiencies, and reduced network issues.

Professional Services

With deep intellectual capital and purpose-built tools, our team delivers a range of standard and custom professional services designed to accelerate your value from HPE Aruba Networking technology.

Project based services include:

- Planning, audit, and assessment
- Architecture review and design
- Deployment, migration, and knowledge transfer

Annual subscription services include:

- Network optimization
- Intelligent Operations
- Customer Experience Management

Our [Education Services](#) allow your team to come up to speed quickly.

HPE GreenLake for Networking

Our NaaS solution, is part of the HPE GreenLake services family, and simplifies network operations, accelerates equipment handling, and increases the value of your HPE Aruba Networking solution. If you need expert guidance and automation-based operations for your team, please explore our NaaS approach through HPE GreenLake for Networking.
