Samsung SMART Signage Razor Narrow Bezel Video Wall

VHR-R Series

Seamless video walls with razor-thin bezels

Samsung's VHR-R Series video wall display has a razor-thin bezel measuring just 0.44 mm, a 0.88 mm bezel-to-bezel depth. A wide viewing angle provides an immersive viewing experience without distraction. Picture enhancement technology delivers vibrant images while a slim and sleek design blends seamlessly into any business environment. All supported by 700 nit brightness, non-glare panels and 24/7 reliability for a solution that can meet your business' demands.

Highlights

- Razor-thin 0.44mm even bezel design delivers one immersive, seamless image.
- Wide viewing angles enable clear image presentation for more viewers in large spaces.
- 700 nit brightness and non-glare panel provide high visibility 24/7.
- Picture enhancement technology delivers optimized visuals.
- Slim design creates neat environment and saves space.
- Color Expert Pro Mobile provides quick and easy video wall calibration using a mobile device.
- Multi-step factory calibration delivers content with near-perfect uniformity.
- Meets industry standards, EMC class B compliant and ISTA-6 certified.
- Daisy-chain enables easy UHD content presentation without external equipment.

SAMSUNG

Industry trends

Across industries, businesses are always seeking out the best tools and platforms to ensure their messages are eye-catching and provide a positive brand impression. In large spaces, businesses often look to video walls for a display solution that captures attention in a memorable way. As display technology has improved, customers expect to see video walls with uninterrupted images and narrow bezels to provide a differentiated, lifelike visual presentation. Video walls are also commonly used in professional settings such as control rooms and financial institutions which require displays that present large quantities of easily understandable data without any interruption or distraction in the image. At the same time, businesses are under intense pressure to find efficient, reliable solutions that help save operational costs and eliminate potential technical issues.

Why Samsung's VHR-R Series?

Incorporating Samsung's industry-leading picture technology, the VHR-R series video wall displays deliver a superior, immersive viewing experience. Fine-tuned with a multi-step factory calibration to ensure pixel-level uniform color presentation and enhanced with Samsung's innovative Color Expert Pro Mobile which provides users with a quick and easy tool to ensure the display is delivering perfect images for the conditions of the room without the need for any costly equipment. Industry standard certified for reliable operation and designed and optimized for any business need, the VHR-R series delivers stunning image quality in a slim, spacing-saving design, ideal for a wide range of business uses.

ACM Chipset

Samsung Color Expert Software

STEP 1 Aging > STEP 2 Local Uniformity > STEP 3 Gamma > STEP 4 White Balance

Before calibration / After calibration

Quick & Easy

Cost Effective

Up to 5x5 at once

Comprehensive calibration

Samsung's multi-step factory calibration process tunes video walls to uniform brightness and color throughout multiple displays. In addition to rigorous factory calibration, users can also manage brightness and color uniformity with Samsung's Color Expert Pro, a powerful free software program.

Convenient mobile calibration

Samsung's Color Expert Pro Mobile solution provides a quick and easy video wall calibration through a mobile camera. With the solution's intuitive UI, even non-expert users can adjust up to 5x5 video wall's white balance simultaneously without the need for additional equipment.

* Samsung Color Export Pro Mobile is only available on certain smartphone models.

Immersive and impactful viewing experience

Nearly invisible 0.44 mm bezel

A nearly invisible 0.44 mm even bezel — a 0.88 mm bezel-to-bezel depth — enables content to be delivered as one seamless image. Additionally, the display helps to eliminate any potential image distortion and provides a more immersive viewing experience.

Image enhancement technology

Samsung's powerful picture enhancement technology ensures all content is vibrant and clear. With Picture Enhancer mode, color saturation and contrast are improved by adjusting the gamma curve. Using Black Equalizer mode, dark images are lightened, so details are easier to see.

View content from any angle

The display's wide viewing angles mean content is easily visible even if viewers aren't standing directly in front of the display. Audiences can get clear and accurate information regardless of video wall layout or location.

Vibrant images 24/7

Experience brilliant image presentation with an impressive 700 nit brightness allowing businesses to deliver clear information 24/7. The display's non-glare panels provide better visibility regardless of ambient light, ensuring critical information is always visible.
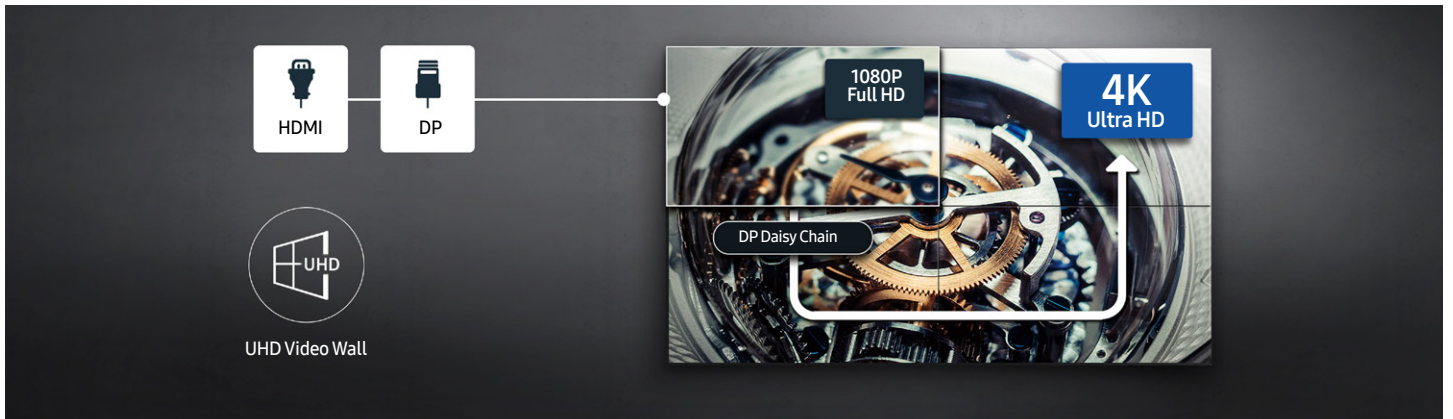

Subtle layout for any location

Slim Depth
69.9mm

Modern, slim design

VHR-R displays feature an elevated design aesthetic with an ultra-slim depth of less than 70 mm. This allows the display to save space and create a clean, modern look for retail or other public spaces.

# Efficient and reliable operation

Advanced UHD presentation

Samsung video walls provide an impressive UHD viewing experience with minimal effort. With daisy chain design utilizing DisplayPort 1.2 and HDMI ports, the VHR-R display can project UHD content across multiple screens up — to 5 x 5 — without requiring an external graphic card or UHD splitters.

Intuitive all-in-one operations

The UHD Signage Player Box combines information processing and content management tools into a single platform, for added operational simplicity. Weighing just 0.6 kg, even with embedded MagicINFO S Player 6 and SSSP 6, the compact design of the box makes it an ideal solution.

* The Signage Player Box is sold separately.

Industry standard certified

The VHR-R series is EMC class B compliant, ensuring a safe viewing environment by meeting strict standards of electromagnetic wave emission. The display packaging also passed a rigorous 4-step test in an ISTA-certified laboratory designed minimizes possible damage during delivery.

* EMC: Electromagnetic compatibility
  ISTA: International Safe Transit Association

Specifications

Model			VH55R-R
Panel	Diagonal Size	Class	55"
		Measured	54.6" /138.7cm
	Type		IPS
	Resolution		1920*1080
	Pixel Pitch (mm)		0.63mm(H) * 0.63mm(V)
	Active Display Area		1209.6 * 680.4mm
	Brightness(Typ.)		Max 700 nit
	Contrast Ratio (Typ.)		1100:1
	Viewing Angle(H/V)		178/178
	Response Time (G to G)		8ms
	Display Colors		8 bit - 16.7M
	Color Gamut		72%
	Operation Hour		24/7
	Haze		28%
Display	Dynamic C/R		30,000:1
	H-Scanning Frequency		57.3kHz ~ 70kHz
	V-Scanning Frequency		48Hz ~ 75Hz
	Maximum Pixel Frequency		78MHz
Sound	Speaker Type		N/A
Connectivity	INPUT	RGB	DVI-D, Display Port 1.2
		VIDEO	HDMI 2.0 (2)
		HDCP	HDCP 2.2
		AUDIO	Stereo mini Jack
		USB	Only F/W upgrade
	OUTPUT	RGB	DP1.2(Loop-out)
