

4XEM's 10ft VGA to HDMI Adapter with 3.5mm Audio Jack and USB Power

4XEM Part- 4XVGAHDMIUAP10

Upgrade your connectivity by incorporating legacy TVs and monitors. 4XEM's HDMI to VGA Adapter is designed to utilize the VGA port found on older devices to connect to more recent devices through the HDMI or USB connectors. This Adapter supports resolutions up to 1080P which can be a steep incline in video quality. Of course, VGA ports are found on more than just legacy products and this device works with these products as well.

Additionally, this product comes with a 3.5mm Audio Jack and USB connector gives this adapter the added benefit of audio in conjunction with the video.

Problem it solves: Connect HDMI to VGA devices with high quality audio and video. This Adapter is designed to give legacy products a spot in modern networks.
