The following information is for FCC compliance of Class A devices: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio-frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case users will be required to correct the interference at their own expense.

The following information is for FCC compliance of Class B devices: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If the equipment causes interference to radio or television reception, which can be determined by turning the equipment off and on, users are encouraged to try to correct the interference by using one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Modifications to this product not authorized by Cisco could void the FCC approval and negate your authority to operate the product.

CHAPTER 1

Your Headset

- [What's in the Box, on page 1](#)
- [How to Wear Your Headset, on page 2](#)
- [Download and Set Up the Cisco Headsets app on Your Mobile Device, on page 3](#)
- [Turn Your Headset On and Off, on page 4](#)
- [Headset Connection, on page 5](#)
- [Headset Power, on page 9](#)
- [Voice Assistant, on page 11](#)
- [About Audio Notifications, on page 12](#)

What's in the Box

Your Cisco Headset 730 comes with the following accessories:

- Cisco Headset 730

- Hard case

- USB Adapter

- USB-A to USB-C cable

- 3.5 mm cable

How to Wear Your Headset

Adjust your headband so that your headset fits comfortably on your head. Make sure the headset microphones are positioned forward.

Download and Set Up the Cisco Headsets app on Your Mobile Device

Cisco Headsets is a mobile app that lets you update, control, and customize your headset from any iPhone or Android mobile device. You can upgrade your headset, adjust your noise cancellation levels, change your equalizer settings, and manage your headset notifications all from the app interface.

Procedure

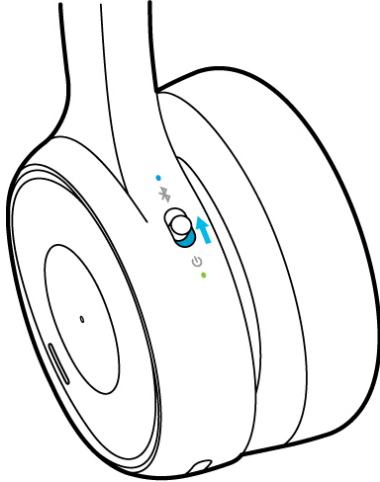

-
- Step 1** On your mobile device, open your preferred app store and download Cisco Headsets.
- Step 2** Open Cisco Headsets and follow the app set-up instructions.
-

Turn Your Headset On and Off

The **Power/Bluetooth** switch is located on the back of the left ear cup.

Procedure

Step 1 Slide the **Power/Bluetooth** switch up to turn on the headset.

Step 2 Slide the **Power/Bluetooth** switch down to turn off the headset.

Note It takes about 5 seconds for the headset to fully power down.

Headset Connection

Connect Your Headset to a Bluetooth Device

Put your headset into pairing mode to make it discoverable to other devices. Your Cisco Headset 730 can save up to eight different Bluetooth devices and maintain simultaneous connections with up to two devices at once.

Note If you already have two active Bluetooth sources, you must disconnect one before you can save another Bluetooth device to your headset.

You can also follow the prompts in the Cisco Headsets app when you connect your headset to your mobile phone.

Procedure

Step 1 Slide up and hold the **Power/Bluetooth** switch for two seconds until the Bluetooth LED blinks.

Step 2 Enable Bluetooth on your device.

You can enable and disable Bluetooth from the **Settings** menu on most call devices.

Step 3 Select your headset from the device list.

Your headset will appear in the device list as **Cisco HS 730** followed by the last three digits of your headset serial number.

Related Topics

[Your Headset Serial Number](#), on page 33

Bluetooth LED

The Bluetooth LED is located on the back of the left ear cup at the top of the **Power/Bluetooth** switch and shows your headset connection status.

Table 1: Bluetooth LED Status

Light Status	System State
 Solid blue, then off	Successful Bluetooth connection
 Blinks blue	Headset in Pairing Mode

Manage Your Bluetooth Connections in the Cisco Headsets App

You can use the Cisco Headsets mobile app to manage your headset Bluetooth connections. Your headset can save up to eight Bluetooth devices and maintain an active connection with two at the same time.

Procedure

-
- Step 1** On your mobile device, open the Cisco Headsets app.
 - Step 2** Tap **Connected to** at the bottom of the home screen.
 - Step 3** Select the device you wish to connect or disconnect.
-

Use the USB Adapter

Your Cisco Headset 730 comes with a USB Adapter for use with call devices that don't have a Bluetooth option. The USB Adapter comes out of the box pre-paired to your headset. When the adapter is plugged into a powered USB port, such as in a laptop or a Cisco Webex DX device, the adapter automatically connects to your headset.

When you want to disconnect your headset, simply unplug the adapter from the call device. It takes about 10 minutes for your headset to accept another active Bluetooth connection after you disconnect the USB Adapter. You can also turn your headset off then on again to quickly pair a new device.

Procedure

-
- Step 1** Plug in your USB Adapter to your preferred device.

- Step 2** Turn on your Cisco Headset 730.
- Step 3** Select **Cisco HS USB Adapter** from your Bluetooth device list.
-

Pair the USB Adapter to Your Headset

You can re-pair your USB Adapter if you have erased your headset's Bluetooth pairings or need to replace your adapter.

Procedure

- Step 1** Connect the USB Adapter to your chosen device.
- Step 2** Use a pen or a paper clip to press down the **Pairing** button on the USB Adapter for four seconds. The blue LED on top of the adapter blinks when it enters pairing mode.

- Step 3** On your headset, slide and hold the **Power/Bluetooth** switch for two seconds. The adapter and your headset pair automatically.
-

Alternate Between Active Bluetooth Sources

You can connect up to two Bluetooth devices to your headset at one time. Active calls are automatically placed on hold when you answer a call on a different source.

Procedure

To change your Bluetooth source, play music or answer a call on a different connected source.

Note Pause music playback before you switch to a different music source.

Delete Paired Devices

You can erase all saved Bluetooth devices from your headset.

Note This will also erase the USB Adapter from your headset's memory. See [Pair the USB Adapter to Your Headset](#), on page 7 to re-pair the adapter to your headset.

Procedure

Slide and hold the **Power/Bluetooth** switch for nine seconds, until you hear "Bluetooth records erased."

Use the USB-C Cable

Use the included USB-C cable to connect your headset with your laptop, Cisco IP Phone, or Cisco Webex DX device.

Procedure

Step 1 Plug the USB-C cable into the port at the bottom of the left ear cup.

Step 2 Connect the other end of the cable to your intended device.

Step 3 Slide the **Power/Bluetooth** slider up to turn on the headset.

Use the 3.5 mm Audio Cable

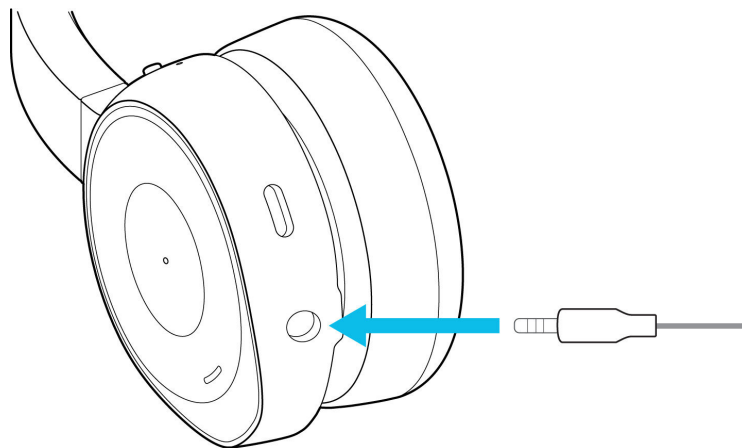

Use the included 3.5 mm audio cable to connect your headset with your laptop or mobile device. You can use the audio cable to connect to a non-wireless device or if your headset battery is low.

Note You can't control calls or music playback when you use the 3.5 mm cable. Any connected Bluetooth sources will have priority over the 3.5 mm audio connection.

Procedure

Step 1 Plug the 3.5 mm audio cable into the port at the bottom of the left ear cup.

Step 2 Insert the other end of the cable into the 3.5 mm jack on your device.

Headset Power

Charge Your Headset with the USB-C Cable

Use the included USB-C cable to charge your headset. It takes about 2.5 hours to fully charge the headset.

Procedure

Step 1 Insert the USB-C cable into the USB-C charging port at the bottom of the left ear cup.

Step 2 Plug the USB-A end of the cable into any powered USB port.

Check Your Remaining Battery Life

When you power on your headset, a voice notification announces your remaining battery charge. Your headset notifies you when you have less than an hour of talk time remaining.

Note Voice notifications are turned on by default. You can toggle your headset voice notifications in the Cisco Headsets mobile app.

You can find more detailed battery charge information through the Cisco Headsets app.

Procedure

Slide the **Power/Bluetooth** switch up and let go.

- If you are wearing your headset, you can hear how many hours of talk time remain.
- If you are not wearing the headset, the power LED blinks to show your battery level.

Table 2: LED Status

Power LED	Battery Charge	Voice Prompt
	15 hours or more of talk time remaining.	"Battery charge: High."
	Between 15 and 5 hours of talk time remaining.	"You have [X] hours of talk time remaining."
	Less than 5 hours of talk time remaining.	"You have [X] hours of talk time remaining."

Voice Assistant

You can quickly access Apple Siri, Google Assistant, or Cortana on your mobile device or laptop through your Cisco Headset 730.

Note You can't set your headset to access multiple voice assistants at the same time.

Activate Your Mobile Voice Assistant on Your Cisco Headset 730

By default, the Cisco Headset 730 supports the voice assistants, Apple Siri, Google Assistant, and Cortana on Windows 10. You can enable or disable your voice assistant support through the Cisco Headsets mobile app.

Before you begin

Make sure your mobile device or laptop is connected to a Wi-Fi or cellular data network.

Procedure

On the right ear cup, press the **Play** button twice.

Enable Your Voice Assistant in the Cisco Headsets App

You can enable and disable the voice assistant feature on your Cisco Headset 730 through the Cisco Headsets mobile app.

Procedure

- Step 1** On your mobile device, open Cisco Headsets and tap **Settings > General**
- Step 2** Toggle **Enable voice assistant** on or off.

About Audio Notifications

By default, your headset plays audio notifications for a number of activities and scenarios. The following table shows the situations associated audio messages.

Table 3: Headset Audio Notifications

Action	Audio Prompt
The headset battery has more than 15 hours of talk time.	"Battery charge: high."
The headset battery has less than 15 hours of talk time.	"You have [X] hours of talk time remaining."
You have an incoming call.	"You have an incoming call."

Action	Audio Prompt
You press the Mute button while on a call.	"Muted."
You unmute your headset while on a call.	"Unmuted."
You speak while your headset is muted on a call.	"You are muted."
Your headset connects with a Bluetooth source	"Connected."
Your headset disconnects from the first Bluetooth source	"Disconnected."
You press the Mute button without an active call.	"Busy Light on."
You deactivate the Presence LED light.	"Busy Light off."
You end a call with the Call button.	"Call ended."
You reject a call with the Call button.	"Call rejected."
The headset is in pairing mode.	"Pairing mode. Look for Cisco Headset 730 in your list of Bluetooth devices."
You turn the headset on.	"Headset on."
You turn the headset off.	"Headset off."
You are erasing all Bluetooth devices.	"Keep holding the Bluetooth button to erase all Bluetooth device records."
You erase the headset Bluetooth memory.	"Bluetooth records erased."

Customize Your Headset Notifications

You can customize which audio notifications you want to hear in your headset.

Procedure

-
- Step 1** In the Cisco Headsets app, select your headset and press **Settings > Audible Notification**.
- Step 2** Select the notification setting you want to change. Your changes save automatically.
-

CHAPTER 2

Make Calls

- [Call Functions, on page 15](#)
- [Presence LED Lights, on page 18](#)
- [Adjust How Much Voice Feedback You Hear in Your Headset, on page 19](#)

Call Functions

Answer a Call

The **Call** button is located on the face of the left ear cup.

Procedure

Press the **Call** button once to answer a call.

End a Call

You can end a call with the **Call** button on your headset. Your headset plays a tone when you end your call. The call button is located on the face of the left ear cup.

Procedure

Press and hold the **Call** button for two seconds.

Reject an Incoming Call

The **Call** button is located on the face of the left ear cup.

Procedure

Press the **Call** button twice to reject an incoming call.

Hold a Call

The **Call** button is located on the face of the left ear cup.

Procedure

Press the **Call** button once to place an active call on hold.

Mute Your Headset

The **Mute**  button is located on the front of the left ear cup. If you have **Mute reminder** enabled through the Cisco Headsets app, your headset will alert you when you try to talk while your microphone is muted.

Procedure

- Step 1** Press **Mute**  once to turn off your microphone on an active call.
- Step 2** Press **Mute**  again to turn your microphone back on.
-

Presence LED Lights

The Presence LED Lights on your headset let others know when you're busy. The Presence LED Lights automatically show solid red when you're on a call. When you aren't on a call, you can manually turn on the LEDs with **Mute** .

Table 4: Presence LED Light Status

Light Status	System State
 Solid red	Active call/Busy
 Blinks red	Incoming call

Adjust How Much Voice Feedback You Hear in Your Headset

With the Cisco Headsets app, you can adjust how much of your own voice you want to hear through your headset speaker when you're on a call.

Procedure

-
- Step 1** In the Cisco Headsets app, select your headset and press **Settings > Audio**.
- Step 2** Tap **Sidetone** and select your desired level.
-

Toggle Lower Your Voice

The **Lower Your Voice** feature in the Cisco Headset 730 dynamically adjusts your headset sidetone while on an active call. If you begin to make too much noise on a call, your headset audio feedback increases so that you intuitively adjust your voice to compensate. You can turn **Lower Your Voice** on and off through the Cisco Headsets app.

Procedure

- Step 1** Open Cisco Headsets and select **Settings**.
- Step 2** Press **Audio** and toggle **Lower Your Voice** on or off.
-

CHAPTER 3

Music Playback and Audio Settings

- [Music Controls, on page 21](#)
- [Turn Noise Cancellation On and Off, on page 23](#)
- [Turn Ambient Mode On and Off, on page 24](#)
- [Customize Your Headset Equalizer Settings, on page 24](#)
- [Reset Your Headset Settings, on page 25](#)

Music Controls

Play and Pause Music

You can control music playback on the face of the right ear cup. Music playback automatically pauses when you have an incoming call and resumes after the call ends.

Procedure

Press the **Play** button in the center of the right ear cup to pause and play music with your headset.

Skip a Track

Your headset's music controls are located on the face of the right ear cup.

Procedure

Press > or < to skip a track.

Adjust Your Headset Volume

The volume buttons are located on the face of the right ear cup.

Procedure

Press + and - to adjust your headset volume.

Turn Noise Cancellation On and Off

The **Noise Cancellation** switch is located on the back of the right ear cup. By default, your headset automatically adapts to your surrounding ambient noise level. You can disable **Adaptive Noise Cancellation** and customize your own noise cancellation level in the Cisco Headsets mobile app.

Procedure

- Step 1** Slide the **Noise Cancellation** switch down to **NC** to turn on noise cancellation.

- Step 2** Slide the **Noise Cancellation** switch to **OFF** to turn noise cancellation off.

Customize Your Noise Cancellation Level in the Cisco Headsets App

By default, your headset noise cancellation strength is set to 100%. You can manually adjust how much noise cancellation you hear in your headset through the Cisco Headsets app. If you enable **Adaptive Noise Cancellation**, your headset noise cancellation level automatically adjusts based on your surroundings.

Procedure

- Step 1** In the Cisco Headsets mobile app, select your headset and press **Settings > Audio**.
- Step 2** Slide the **Noise Cancellation** slider left or right to adjust your noise cancellation level.
-

Turn Ambient Mode On and Off

Ambient mode uses the microphones in your headset to enhance your surroundings. You can use this feature when you want to hear more of your surroundings or have a conversation with your headset on.

Procedure

- Step 1** Slide the **Noise Cancellation** switch on the right ear cup up to **ANC** to turn on Ambient mode.

- Step 2** Slide the **Noise Cancellation** switch to **OFF** to turn Ambient mode off.
-

Customize Your Headset Equalizer Settings

You can customize the blend of bass and treble in your headset audio with the Cisco Headsets mobile app. Your audio setting selection saves automatically.

Procedure

On the Cisco Headsets home screen, tap on **Voice**, **Music**, or **Cinema**.

Reset Your Headset Settings

You can restore your default headset settings with the Cisco Headsets mobile app.

Procedure

In Cisco Headsets, select **Settings** > **Reset Settings**.

CHAPTER 4

Troubleshooting

- [First Steps, on page 27](#)
- [Targeted Troubleshooting Solutions, on page 27](#)
- [Update Your Headset Firmware, on page 32](#)
- [Check Your Headset Firmware, on page 32](#)
- [Your Headset Serial Number, on page 33](#)
- [Clean Your Headset, on page 34](#)

First Steps

Try these solutions first if you experience problems with your Cisco Headset 730.

- Make sure your headset is fully charged. See [Headset Power, on page 9](#).
- Make sure your headset is powered on. See [Turn Your Headset On and Off, on page 4](#).
- Make sure your audio device supports your Bluetooth connection. See [Compatible Cisco Call Devices](#).
- Disconnect other active Bluetooth devices.
- Increase the volume on your headset or call device. See [Adjust Your Headset Volume, on page 22](#).
- Download Cisco Headsets to your mobile device and run the available software updates. See [Download and Set Up the Cisco Headsets app on Your Mobile Device, on page 3](#).
- Connect to a different call device. See [Connect Your Headset to a Bluetooth Device, on page 5](#).
- Move your headset closer to your desired call device and away from any potential sources of radio interference or obstructions.

Targeted Troubleshooting Solutions

If the above steps don't resolve your issue, see the list of troubleshooting scenarios below to identify symptoms and solutions to common issues. If you're still unable to resolve your issue, contact Cisco support.

My Bluetooth Device Can't Find the Headset

Try these steps if your headset doesn't connect with your Bluetooth device:

- On your device:
 - Turn Bluetooth off then on again.
 - Delete the headset from the list of Bluetooth devices and pair the headset again.
- Reboot your headset.
- Make sure your headset is within 3 feet (1 meter) of your intended device.
- Clear all paired devices from the headset.

Related Topics

I Can't Connect a New Device to the Headset

Try these steps if your headset has can't connect with your intended call device:

- Reboot your headset.
- Disconnect other paired Bluetooth devices from your headset.
- Reboot the Bluetooth device you want to pair with your headset.
- Clear all paired devices from the headset.
- Make sure your headset is within 3 feet (1 meter) of your intended device.

Related Topics

[Turn Your Headset On and Off](#), on page 4

[Manage Your Bluetooth Connections in the Cisco Headsets App](#), on page 6

[Delete Paired Devices](#), on page 7

My Headset Shows Up Twice in My Bluetooth Device List

Your Cisco Headset 730 shows up in your Bluetooth device list as **Cisco HS 730** followed by the last three digits of your headset serial number.

On some Windows 10 devices, your Cisco Headset 730 may appear twice in the Bluetooth device list. Pair with the Cisco Headset 730 that displays **Audio** underneath your headset name.

You Experience Poor Audio Quality in Your Headset

Try these steps if you experience poor audio quality in your headset:

- Try a different audio source.
- Disconnect other paired devices from your headset.

- Connect your headset to an audio source with the USB or 3.5mm cable.
- Turn off any audio enhancement features on your device or music app.
- On your device:
 - Turn Bluetooth off then on again.
 - Delete your headset from the list of connected Bluetooth devices and reconnect your headset.

My Headset is On but has No Sound

Try these steps if you can't hear any sound in your headset.

- Check the volume level on your headset.
- Ensure that the audio output on your device is set to **Cisco Headset 730**.
- Turn off music or hold a call on other active sources.
- Reboot your headset.
- If you are listening to music:
 - Press **Play** on your device to make sure audio is playing.
 - Play audio from content stored directly on your device.
- Make sure your headset is within 30 feet (9 meters) of your intended device.

[Alternate Between Active Bluetooth Sources](#), on page 7

People Can't Hear Me Well

Try these steps if the microphone on your Cisco Headset 730 doesn't pick up your voice:

- Make sure that your headset faces forward on your head. If you wear your headset backwards, the microphones won't work properly.

- Disconnect other Bluetooth devices from your headset.
- Try to make a call on a different device.
- Connect to your device with the USB-C or 3.5 mm cable.
- Make sure the microphone isn't muted.
- On your device:
 - Turn Bluetooth off, then on again.
 - Delete your headset from the list of connected Bluetooth devices and reconnect your headset.

Related Topics

My Headset Doesn't Charge

Try these steps if your headset doesn't charge:

- Make sure the USB-C cable is connected to the USB-C port on your headset. The Power LED beneath the **Power/Bluetooth** switch lights up when the headset charges.

- Make sure that both ends of the USB cable are secure.
- If the headset has been exposed to extreme high or low temperatures, let the headset return to room temperature before you try to charge the headset.
- Try a different USB-A wall charger or AC power source.
- If you are using the Cisco Headset 730 Charging Station, make sure the headset is properly seated. The LED on the front of the stand shows solid white when the headset is properly seated.

Related Topics

[Charge Your Headset with the USB-C Cable](#), on page 9

The Cisco Headsets App Doesn't Work on My Mobile Device

Try these steps if you have problems with the Cisco Headsets app on your mobile device:

- Make sure that your mobile device is compatible with the Cisco Headsets app and meets the minimum system requirements. For more information, refer to the app store on your mobile device.
- Uninstall Cisco Headsets on your mobile device, then reinstall the app.

Google Assistant Doesn't Respond

Try these steps if you have problems with Google Assistant through your Cisco Headset 730:

- Try to directly activate Google Assistant on your mobile device.
- Make sure that the voice assistant feature is enabled through the Cisco Headsets app.
- Connect your mobile device to a Wi-Fi or cellular data network.
- Make sure that you are in a country where Google Assistant is available.
- Make sure you have the most recent version of the Google Assistant app.
- Make sure your mobile device is compatible with Google Assistant.
- For additional support, visit <https://support.google.com/headphones>

Related Topics

[Enable Your Voice Assistant in the Cisco Headsets App](#), on page 12

Siri Doesn't Respond

Try these steps if you can't activate Siri through your Cisco Headset 730:

- Try to access Siri directly on your mobile device.
- Make sure the voice assistant feature is enabled through the Cisco Headsets app.
- Connect your mobile device to a Wi-Fi or cellular data network.
- Make sure your mobile device is compatible.

Related Topics

[Enable Your Voice Assistant in the Cisco Headsets App](#), on page 12

Update Your Headset Firmware

You can update your headset firmware through the Cisco Headsets mobile app, a Cisco IP Phone, or on Cisco Jabber (version 12.8 or later). Headset upgrades take about 7–10 minutes to complete. The power indicator LED alternates red, amber, and green while the headset upgrades.

Procedure

- Step 1** To begin your upgrade, do one of these actions:
- Pair your headset to your smart phone, and open the Cisco Headsets mobile app.
 - Connect your headset with the USB-C cable to a Cisco IP Phone.
 - Connect your headset with the USB-C cable to a computer with Cisco Jabber.
- Step 2** Follow the on-screen instructions.

Related Topics

[Check Your Headset Firmware](#), on page 32

Check Your Headset Firmware

Check Your Headset Firmware in the Cisco Headsets App

You can check your current firmware load in the Cisco Headsets app.

Note The app will send you a prompt when a new firmware version is available.

Procedure

- Step 1** On your mobile device, open Cisco Headsets.
Step 2 Select **Settings > Device Info**.
-

Check Your Headset Firmware on On-Premises Phones

You can check your headset software on any supported Cisco IP Phone.

Procedure

- Step 1** Press **Applications** .
- Step 2** Select **Accessories**.
- Step 3** Highlight **Cisco Headset** and press **Show detail**.
-

Check Your Headset Firmware on Cisco Jabber

You can check your Cisco headset firmware on Cisco Jabber version 12.8 or later.

Procedure

- Step 1** In Cisco Jabber, click the gear icon  and select **Settings > Audio**.
- Step 2** Under the **Speaker** slider, click **Advanced Settings**.
- Your headset model, serial number, and current firmware version displays at the top of the window.
-

Your Headset Serial Number

You can find your Cisco Headset 730 serial number in the following places.

- On the outside of the box your headset shipped in.
- On the interior of the left headband.
- In the Cisco Headsets mobile app.
See [Find Your Serial Number in the Cisco Headsets App, on page 34](#)
- On a connected Cisco IP Phone.
See [Find Your Headset Serial Number on a Cisco IP Phone, on page 34](#)

- In Cisco Jabber for Windows or Mac.
See [Find Your Headset Serial Number in Cisco Jabber](#).

Find Your Serial Number in the Cisco Headsets App

You can find your Cisco Headset 730 serial number in the Cisco Headsets mobile app.

Procedure

- Step 1** On your mobile device, open Cisco Headsets.
- Step 2** Select **Settings** > **Device Info**.
-

Find Your Headset Serial Number on a Cisco IP Phone

You can find your headset serial number on any Cisco IP Phone.

Procedure

- Step 1** Press **Applications** .
- Step 2** Select **Accessories**.
- Step 3** Highlight **Cisco Headset** and press **Show detail**.
-

Find Your Headset Serial Number in Cisco Jabber

You can find your Cisco headset serial number on Cisco Jabber for Windows and Mac, version 12.8 or later.

Procedure

- Step 1** In Cisco Jabber, click the gear icon  and select **Settings** > **Audio**.
- Step 2** Under the **Speaker** slider, click **Advanced Settings**.
- Your headset model, serial number, and current firmware version displays at the top of the window.
-

Clean Your Headset

You may need to periodically clean your headset.

Procedure

Wipe the headband and ear cups on your headset with a soft, dry cloth.

Attention Don't allow moisture to get inside your ear cups, the USB-C port, or the 3.5 mm jack.

CHAPTER 5

Product Safety

- [Compliance Statements, on page 37](#)

Important Headset Safety Information

High Sound Pressure—Avoid listening to high volume levels for long periods to prevent possible hearing damage.

When you plug in your headset, lower the volume of the headset speaker before you put the headset on. If you remember to lower the volume before you take the headset off, the volume will start lower when you plug in your headset again.

Don't allow moisture to get inside your ear cups, the USB-C port, or the 3.5 mm jack.

Be aware of your surroundings. When you use your headset, it may block out important external sounds, particularly in emergencies or in noisy environments. Don't use the headset while driving. Don't leave your headset or headset cables in an area where people or pets can trip over them. Always supervise children who are near your headset or headset cables.

Compliance Statements

Compliance Statements for the USA

General RF Exposure Compliance

This device has been evaluated and found compliant to the ICNIRP (International Committee on Non-Ionizing Radiation Protection) limits for Human Exposure of RF Exposure.

Part 15 Radio Device

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and

2. This device must accept any interference received, including interference that may cause undesired operation.

**Caution**

The Part 15 radio device operates on a non-interference basis with other devices operating at this frequency. Any changes or modification to said product not expressly approved by Cisco, including the use of non-Cisco antennas, could void the user's authority to operate this device.

Compliance Statements for Canada

This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. Privacy of communications may not be ensured when using this phone.

This product meets the applicable Innovation, Science and Economic Development Canada technical specifications.

Avis de Conformité Canadien

Cet appareil est conforme aux normes RSS exemptes de licence RSS d'Industry Canada. Le fonctionnement de cet appareil est soumis à deux conditions : (1) ce périphérique ne doit pas causer d'interférence et (2) ce périphérique doit supporter les interférences, y compris celles susceptibles d'entraîner un fonctionnement non souhaitable de l'appareil. La protection des communications ne peut pas être assurée lors de l'utilisation de ce téléphone.

Le présent produit est conforme aux spécifications techniques applicables d'Innovation, Sciences et Développement économique Canada.

Canadian RF Exposure Statement

THIS DEVICE MEETS THE LIMITS AS REFERENCED BY ISED RSS-102 R5 FOR EXPOSURE TO RADIO WAVES

Your device includes a radio transmitter and receiver. It is designed not to exceed the General populace (uncontrolled) limits for exposure to radio waves (radio frequency electromagnetic fields) as referenced in RSS-102 which references Health Canada Safety Code 6 and include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

As such the systems are designed to be operated as to avoid contact with the antennas by the end user. It is recommended to set the system in a location where the antennas can remain at least a minimum distance as specified from the user in accordance to the regulatory guidelines which are designed to reduce the overall exposure of the user or operator.

The device has been tested and found compliant with the applicable regulations as part of the radio certification process.

Déclaration d'Exposition aux RF Canadienne

CE PÉRIPHÉRIQUE RESPECTE LES LIMITES DÉCRITES PAR LA NORME RSS-102 R5 D'EXPOSITION À DES ONDES RADIO

Votre appareil comprend un émetteur et un récepteur radio. Il est conçu pour ne pas dépasser les limites applicables à la population générale (ne faisant pas l'objet de contrôles périodiques) d'exposition à des ondes radio (champs électromagnétiques de fréquences radio) comme indiqué dans la norme RSS-102 qui sert de référence au règlement de sécurité n°6 sur l'état de santé du Canada et inclut une marge de sécurité importantes conçue pour garantir la sécurité de toutes les personnes, quels que soient leur âge et état de santé.

En tant que tels, les systèmes sont conçus pour être utilisés en évitant le contact avec les antennes par l'utilisateur final. Il est recommandé de positionner le système à un endroit où les antennes peuvent demeurer à au moins une distance minimum préconisée de l'utilisateur, conformément aux instructions des réglementations qui sont conçues pour réduire l'exposition globale de l'utilisateur ou de l'opérateur.

Le périphérique a été testé et déclaré conforme aux réglementations applicables dans le cadre du processus de certification radio.
