Federal Communications Commission Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference, and
- This device must accept any interference received including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with manufacturer's instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Canadian Department of Communications Statement

This digital apparatus does not exceed the Class B limits for radio noise emissions from digital apparatus set out in the Radio Interference Regulations of the Canadian Department of Communications.

This class B digital apparatus complies with Canadian ICES-003.

As an Energy Star® Partner, our company has determined that this product meets the Energy Star® guidelines for energy efficiency.

Safety information

- Before setting up this Portable USB Monitor, carefully read all the documentation that came with the package.
- To prevent fire or shock hazard, never expose this Portable USB Monitor to rain or moisture.
- Never try to open this Portable USB Monitor cabinet.
- Before using this Portable USB Monitor, make sure all cables are correctly connected and the power cables are not damaged. If you detect any damage, contact your dealer immediately.
- Avoid dust, humidity, and temperature extremes. Do not place this Portable USB Monitor in any area where it may become wet. Place this Portable USB Monitor on a stable surface.
- Never push objects or spill liquid of any kind into the slots on this Portable USB Monitor cabinet.
- If you encounter technical problems with this Portable USB Monitor, contact a qualified service technician or your retailer.
- This Portable USB Monitor is powered by USB port which complies with LPS and SELV circuit according to IEC60950-1:2005.

Care & cleaning

- Cleaning. Turn your monitor off and unplug the cable. Clean the monitor surface with a lint-free, non-abrasive cloth. Stubborn stains may be removed with a cloth dampened with mild cleaner.
- Avoid using a cleaner containing alcohol or acetone. Use a cleaner intended for use with the LCD. Never spray cleaner directly on the screen, as it may drip inside the monitor and cause an electric shock.

The following symptoms are normal with the monitor:

- You may find slightly uneven brightness on the screen depending on the desktop pattern you use.
- When the same image is displayed for hours, an afterimage of the previous screen may remain after switching the image. The screen will recover slowly or you can turn off the Power Switch for hours.
- When the screen becomes black or flashes, or cannot work anymore, contact your dealer or service center to fix it. Do not repair the screen by yourself!

WARNING: Information to prevent injury to yourself when trying to complete a task.

CAUTION: Information to prevent damage to the components when trying to complete a task.

IMPORTANT: Information that you **MUST** follow to complete a task.

NOTE: Tips and additional information to aid in completing a task.

Where to find more information

Refer to the following sources for additional information and for product and software updates.

1. **ASUS websites**

The ASUS websites worldwide provide updated information on ASUS hardware and software products. Refer to <http://www.asus.com>

2. **Optional documentation**

Your product package may include optional documentation that may have been added by your dealer. These documents are not part of the standard package.

Takeback services

ASUS recycling and takeback programs come from our commitment to the highest standards for protecting our environment. We believe in providing solutions for our customers to be able to responsibly recycle our products, batteries and other components as well as the packaging materials.

Please go to <http://csr.asus.com/english/Takeback.htm> for detail recycling information in different region.

Product information for EU energy label

1.1 Welcome!

Thank you for purchasing the ASUS® Portable USB Monitor!

The latest ASUS Portable USB Monitor provides great portability and simplicity to your daily life, enhancing both of your viewing experience and style.

1.2 Package contents

Check your package for the following items:

- ✓ Portable USB Monitor
- ✓ Quick Start Guide
- ✓ Warranty Card
- ✓ USB Type-C Cable
- ✓ USB Type-C to A adapter (optional)
- ✓ USB Type-C to A cable (optional)
- ✓ Mini HDMI to HDMI Cable
- ✓ Smart cover
- ✓ Calibration Report
- ✓ Zenscreen Tripod Cover
- ✓ 18W Adapter

-
- If any of the above items is damaged or missing, contact your retailer immediately.
-

1.3 Monitor introduction

1.3.1 Front view

1. Power button/Power LED
 - Press this button to turn the monitor on/off.
 - The color definition of the power indicator is as the below table.

Status	Description
Blue	ON
Amber	Standby mode
Dark	OFF

2. Menu button
 - Press this button to enter the OSD menu.
3. Close Button
 - Exit the OSD menu.
4. Input select Button & Shortcut Button
 - Default setting for this button is “Input Select”, it can be used to switch input source.
 - “Input Select” can be replaced with other frequent used function, go to “Shortcut” and select your favorite function.
 - Key Lock shortcut key. Press and hold it for 5 seconds to enable/disable Keys Lock.

5. USB Type-C port
6. USB Type-C port(only charging)
7. Earphone
8. Mini HDMI port
9. Proximity sensor

1.3.2 QuickFit Function

The QuickFit function contains two patterns: (1) Grid (2) Photo size.

1. Grid pattern: Facilitates designers and users to organize content and layout on one page and achieve a consistent look and feel.

Alignment grid 1 will be rotated automatically if auto rotation is enabled.

- Auto rotation function is only working under Windows OS by installing DisplayWidget software.

2. Photo size: Provides photographers and other users to accurately view and edit their photos in real size on the screen.

2.1 Monitor standing positions

You can stand up the monitor by several positions with the smart cover.

2.2 Connect the USB monitor with system

A

or

B

C

-
- USB monitor is working by acquiring power from PC/NB when monitor adapter is not plugged in. If USB monitor detects low power output from PC/NB, the “brightness” of monitor will be fixed at “up to 50 or 80 depends on how much of input power detected”, this behavior can avoid monitor from turning off instantly due to lack of power. For higher brightness, please plug in the monitor adapter, the system will enable brightness adjustment to maximum value again.
-

2.3 Announcements

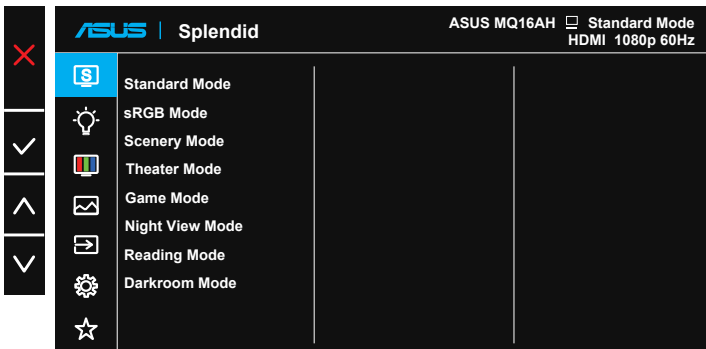

As this product and attached smart cover includes magnet in the structure, there could be potential risk to cause the damage of computer hard disc and objects that are sensitive to magnet.

Please ensure not to stack the product with the computer when computer is in use (power on or standby mode) otherwise the hard drive could possibly be influenced by the result of permanent data missing or the computer display could be switched off due to computer auto protection mechanism. When place this product together with computer in the bag, must have the computer power off to avoid possible hard drive damage problem.

3.1 OSD (On-Screen Display) menu

3.1.1 How to reconfigure

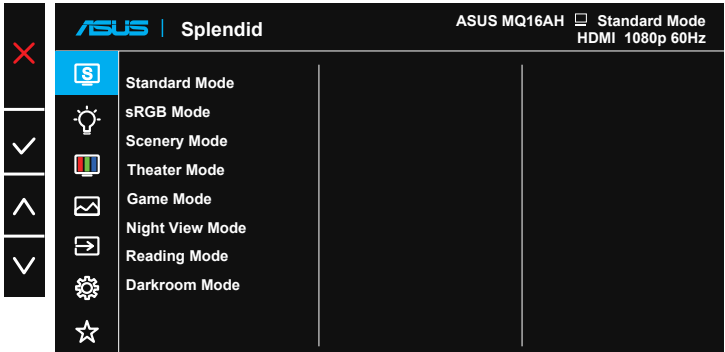

1. Press the MENU button to activate the OSD menu.
2. Press the \wedge / \vee button to toggle between options in the Menu. As you move from one icon to another, the option name is highlighted.
3. To select the highlighted item on the menu press the \checkmark button.
4. Press the \wedge / \vee button to select the desired parameter.
5. Press the \checkmark button to enter the slide bar and then use the \wedge / \vee button, according to the indicators on the menu, to make your changes.
6. Select the \rightarrow to return to previous menu or \checkmark to accept and return to previous menu.

3.1.2 OSD Function Introduction

1. Splendid

This function contains eight sub-functions that you can select for your preference.

- **Standard Mode:** This is the best choice for document editing with SPLENDID™ Video Intelligence Technology.
- **sRGB Mode:** This is the best choice for viewing photos and graphics from PCs.
- **Scenery Mode:** This is the best choice for scenery photo displaying with SPLENDID™ Video Intelligence Technology.
- **Theater Mode:** This is the best choice for movie watching with SPLENDID™ Video Intelligence Technology.
- **Game Mode:** This is the best choice for game playing with SPLENDID™ Video Intelligence Technology.
- **Night View Mode:** This is the best choice for playing dark-scene game or watching dark-scene movie with SPLENDID™ Video Intelligence Technology.
- **Reading Mode :** This is the best choice for book reading.
- **Darkroom Mode :** This is the best choice for a weak ambient light environmen.

- In the Standard Mode, the Saturation, SkinTone, Sharpness, and ASCR functions are not user-configurable.
- In the sRGB, the Saturation, Color Temp., SkinTone, Sharpness, Contrast and ASCR functions are not user-configurable.
- In the Reading Mode, the Saturation, SkinTone, Sharpness, ASCR, contrast, and Color Temp functions are not user-configurable.

2. Blue Light Filter

Adjust the energy level of blue light emitted from LED backlight.

- **Blue Light Filter:** In this function, you can adjust the blue light filter from Min to max. Min: no changes; Max: The higher the level, the less blue light is scattered. When blue light filter is activated, the default settings of Standard Mode will be automatically imported. Besides maximum level, the brightness is user-configurable. Maximum is the optimized setting. It is compliance with TUV low blue light certification*. The brightness function is not user configurable.

- When the user adjusts blue light filter bar to maximum level.
- *When color augmentation is in default value (50).

Please refer to the following to alleviate eye strains:

- Users should take some time away from the display if working for long hours. It is advised to take short breaks (at least 5 mins) after around 1 hour of continuous working at the computer. Taking short and frequent breaks is more effective than a single longer break.
- To minimize eye strain and dryness in your eyes, users should rest the eye periodically by focusing on objects that are far away.
- Eye exercises can help to reduce eye strain. Repeat these exercises often. If eye strain continues please consult a physician. Eye exercises: (1) Repeating look up and down (2) Slowly roll your eyes (3) Move your eyes diagonal.
- High energy blue light may lead to eye strain and AMD (Age-Related Macular Degeneration). Blue light Filter to reduce 70% (max.) harmful blue light to avoiding CVS (Computer Vision Syndrome).

3. Color

Select the image color you like from this function.

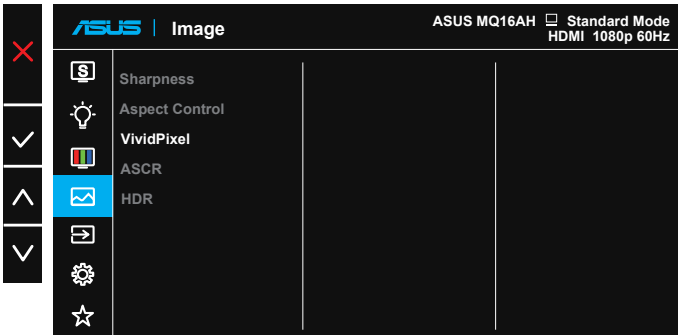

- **Brightness:** The adjusting range is from 0 to 100. When HDR is enabled, the brightness cannot be adjusted.
- **Contrast:** The adjusting range is from 0 to 100.
- **Saturation:** The adjusting range is from 0 to 100.
- **Color Temp.:** Contains three preset color modes (**Cool**, **Normal**, **Warm**) and **User Mode**.
- **Skin Tone:** Contains three color modes including **Reddish**, **Natural**, and **Yellowish**.

- When monitor is connected to input device by Type C port, and monitor detects power from input device is too low, the brightness will be fixed at up to 50 or 80 depends on how much of power received by monitor. As soon as the adapter is plugged in, the brightness can be adjusted to maximum value again.
- In the User Mode, colors of R (Red), G (Green), and B (Blue) are user-configurable; the adjusting range is from 0 ~ 100.

4. Image

You can adjust the image Sharpness, Aspect Control, VividPixel, ASCR and HDR from this main function.

- **Sharpness:** Adjusts the picture sharpness. The adjusting range is from 0 to 100.
- **Aspect Control:** Adjusts the aspect ratio to “Full”, “4:3”.
- **VividPixel:** ASUS Exclusive Technology that brings lifelike visuals for crystal-clear and detail-oriented enjoyment. The adjusting range is from 0 to 100.
- **ASCR:** Select **ON** or **OFF** to enable or disable dynamic contrast ratio function.
- **HDR:** High Dynamic Range. Contains two HDR modes, ASUS Cinema HDR and ASUS Gaming HDR, this item is open to choose when HDR is enabled.

-
- 4:3 is only available when input source is in 4:3 format.
 - When displaying HDR content, image is optimized by HDR standard, the following function(s) are thus not available: Splendid, Blue Light Filter, Gamma, Color.
-

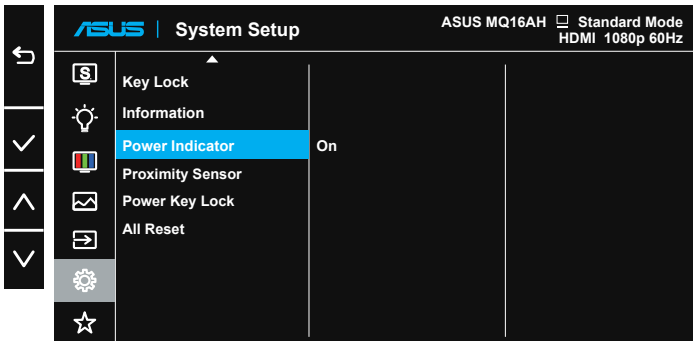

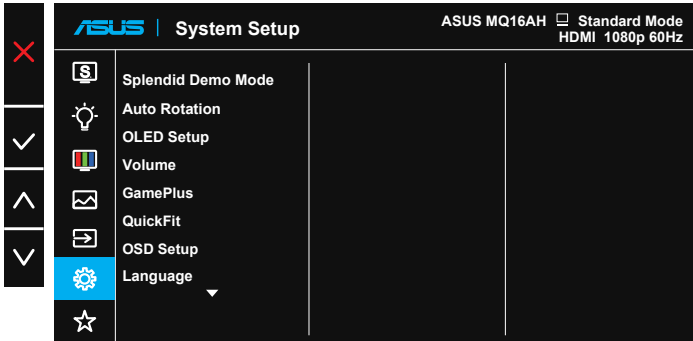

5. Input Select

Select the input source from **HDMI, Type-C 1, Type-C 2** input signal.

6. System Setup

Adjusts the system configuration.

- **Splendid Demo Mode:** Activate the demo mode for the Splendid function.
- **Auto Rotation:** To enable/disable rotate image automatically. Please be noted that Auto rotation function is only working under **Windows OS** by installing DisplayWidget software.
- **OLED Setup:** Special setup according to OLED characteristics. Screen protection can be activated here, you might see the pixel shifting in using but this behavior does not influence usage and image clarity. This mechanism is designed to protect OLED from burn in issue, we suggest you always turn it on.
- **Volume:** Adjusts the output volume level.

- **GamePlus:** The GamePlus Function provides a toolkit and creates a better gaming environment for users when playing different types of games. Particularly, Chrosshair function is specially designed for new gamers or beginners interested in First Person Shooter (FPS) games.

To active GamePlus:

- Select **ON** to enter the GamePlus main menu.
- Press \wedge / \vee button to select between Chrosshair, Timer and Display Alignment function.
- Press \checkmark to confirm the function you choose. Select \times to go off, and exit.

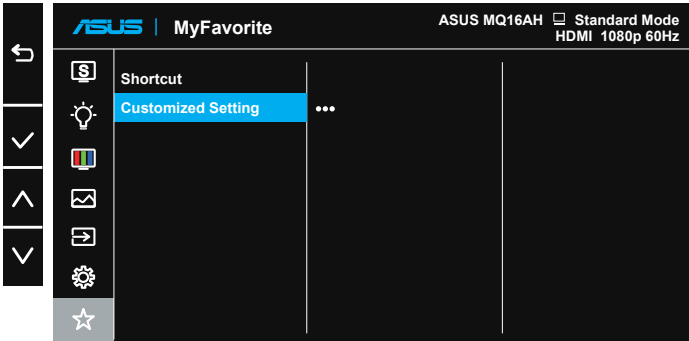

- **QuickFit:** See page 1-4 for details.
- **OSD Setup:** Adjusts the **OSD Timeout**, **DDC/CI**, and **Transparency** of the OSD screen.
- **Language:** Select OSD language. The selections are: **English, French, German, Spanish, Italian, Dutch, Russian, Poland, Czech, Croatia, Hungary, Romania, Portugal, Turkey, Simplified Chinese, Traditional Chinese, Japanese, Korean, Persian, Thai, Indonesian** and **Ukrainian**.
- **Key Lock:** Disable all key functions. Pressing the menu button for more than five seconds to disable key lock function.
- **Information:** Displays the monitor information.
- **Power Indicator:** Turn the power LED indicator on/off.
- **Proximity Sensor:** Embedded proximity sensor prompts the monitor to switch power saving mode when it detects the user is away for above a minute and resumes normal operation when user comes back. The function is optimized when the distance between user and the monitor is within 50cm. And please avoid any obstacle in front of the proximity sensor on the front bezel.
Note: the sensitivity of sensor might be influenced by the ambient light, color of users' clothing and monitor use angle.

- **Power Key Lock:** To disable / enable power key.
- **All Reset:** Selects “**Yes**” to revert all settings to the factory default mode.

7. MyFavorite

You can adjust Shortcut and Customized Setting from this main function.

- **Shortcut** : User can select from “Blue Light Filter” “Splendid”, “Brightness”, “Contrast”, “Auto Rotation”, “Input select” and set as shortcut key. The default setting is Input select.
- **Customized Setting** : You can do your setting according to your favorite.

3.2 Specifications

Model	MQ16AH
Panel Size	15.6" (16:9, 39.62cm) wide screen
Resolution	1920 x 1080
Brightness (Typ.)	360nits (typ.), 400nits (max.)
Contrast (Typ.)	100000:1
Display Colors	1073.7M (10bit)
Digital Input	DisplayPort™ Alt Mode for USB Type-C™ HDMI via Mini HDMI
Colors	Gray
Power Consumption	≤ 15 W
Operating Temp.	0° ~ 40°
Phys. Dimension (WxHxD)	358.70 x 226.15 x 8.95 mm
Box Dimension (WxHxD)	552 x 125 x 394 mm
Net Weight (Esti.)	0.65 kg
Gross Weight (Esti.)	3.65 kg
Regulation Approvals	UL/cUL, CB, CE, CCC, KCC, FCC, BSMI, EAC(CU), RCM, VCCI, J-Moss, UkrSEPRO, RoHS, WEEE, Windows 7 & 8.1 & 10 & 11 WHQL, Blue light filter, Flicker free, Energy Star 8.0
Voltage Rating	5-12V ---, 2.0A
Adapter	ASUS/AD2068M20 100-240V~, 50/60Hz, 0.5A 5V ---, 2A(Normal model) OR 9V ---, 2A(Quick charge model)

*Specifications are subject to change without notice.

3.3 Troubleshooting (FAQ)

Problem	Possible Solution
Power LED is not ON	<ul style="list-style-type: none"> • Press the ⏻ button to check if the monitor is in the ON mode. • Check if the USB Type-C cable is properly connected to the monitor and the computer.
The power LED lights amber and there is no screen image	<ul style="list-style-type: none"> • Check if the monitor and the computer are in the ON mode. • Make sure the USB Type-C cable is properly connected between the Portable USB Monitor and the computer. • Inspect the signal cable and make sure none of the pins are bent. • Connect the computer with another available monitor to check if the computer is properly working.
Screen image is too light or dark	<ul style="list-style-type: none"> • Adjust the Brightness settings via the button.
Screen image bounces or a wave pattern is present in the image	<ul style="list-style-type: none"> • Make sure the USB Type-C cable is properly connected between the Portable USB Monitor and the computer. • Move electrical devices that may cause electrical interference.
Screen image has color defects (white does not look white)	<ul style="list-style-type: none"> • Inspect the USB Type-C cable and make sure that none of the pins are bent.
HDR content is not played properly	<ul style="list-style-type: none"> • Make sure the input source supports HDR playback (with proper system settings and latest software). • Make sure the content is HDR encoded.

Problem	Possible Solution
<p>After connecting with the USB Type-C source device, the power LED lights continuously blinking or showing ASUS logo repeatedly</p>	<ul style="list-style-type: none"> • Insufficient power supply from source USB Type-C devices. Please follow below steps: • Press the Up button , and then connect the USB Type-C cable. This operation will enable built-in safe mode. After displaying ASUS logo, please release the Up button. After ASUS Logo disappearing, there is “safe mode” message OSD showing up. Once “safe mode” message OSD disappears, please set background color to white image or nearly white image (*1). • Press MENU button, main menu OSD is showing. The upper left corner of the OSD will display small red-colored font “S”, indicating it is now in safe mode. Enter brightness setup, press the up key to tune up brightness. During the process, please note down brightness value “Y” up until MQ16AH re-start.(*2). For example, if brightness value shows “70” and MQ16AH restarts when adjusting to “71”, “70” is the “Y” value to note down and is the highest brightness value for the connecting USB-C source device. • Press MENU button, main menu OSD is showing. The upper left corner still indicate “S” as safe mode. Adjust the OSD brightness value to “Y” • Close the OSD and press Up hot key for 5 seconds to turn off safe mode. • Complete.

*1: White color background will consume higher power, so it's better to use white color background to test the power limit from source USB Type-C device.

*2: If MQ16AH does not re-start when adjusting to value 100, that means source USB Type-C device has sufficient power supply.

3.4 Supported Timing List

PC Supported Primary Timing

Resolution	Refresh Rate	Horizontal Frequency
640x480	60Hz	31.469kHz
800x600	60Hz	37.879kHz
1024x768	60Hz	48.363kHz
1280x960	60Hz	60kHz
1280x1024	60Hz	63.981kHz
1440x900	60Hz	55.935kHz
1680x1050	60Hz	65.29kHz
1920x1080	60Hz	67.5kHz

IBM Modes, Factory Preset Timing

Resolution	Refresh Rate	Horizontal Frequency
640x350	70Hz	31.469kHz
720x400	70Hz	31.469kHz

VESA Modes, User Available Timing

Resolution	Refresh Rate	Horizontal Frequency
848x480	60Hz	31.02kHz
1280x720	60Hz	44.772kHz
1280x800	60Hz	49.702kHz
1920x1080	60Hz	66.587kHz
